

# Industry Doctorates in Energy

## Industry Partners Wanted

Help deliver your business objectives by supporting a PhD at one of Scotland's leading Universities

ETP is an autonomous alliance of 13 independent Scottish HEIs providing world-class capability and resources in energy research and innovation. It works in strategic partnership with innovation translators, industry and government to future-proof Scotland's position as a world-class centre of research excellence and globally competitive driving force in energy.

ETP's Energy Industry Doctorate Programme has been running since 2010 and has supported 127 high quality PhD studentships, all with strong industry engagement.

We are delighted to announce the continuation of this very successful and prestigious programme with a further 24 studentships available during 2021 - 2023 over 4 calls, funded by Scottish Government.

These studentships will be awarded across all ETP thematic areas and proposals should relate to the strategic aims of the Scottish Government's Energy Policy.

We are seeking industry partners who will work with us to define new projects relevant to your business aims and be prepared to make a small financial contribution.

Participation in the programme will provide you with a cost-effective means of supporting high quality, applied R&D that is directly relevant to your company's development challenges.

ETP is uniquely placed, through its partnership model, to offer project supervision at one or more of our universities.

Deadline for Call 1 is **11th June 2021**

Edinburgh Napier  
UNIVERSITY

University of  
St Andrews

UWS UNIVERSITY OF THE  
WEST OF SCOTLAND

University of the  
Highlands and Islands  
Oilthigh na Gàidhealtachd  
agus nan Eilean
